AI Assisted Coding

Assignment -14.1

M. Sindhu || 2303A51462 || Batch:- 7

Task 1 – Portfolio Website Design

You are building a personal portfolio website to showcase your work.

Requirements:

• Create sections for About Me, Projects, and Contact.

• Use AI to:

o Suggest color palettes and typography.

o Create a responsive layout with Grid/Flexbox.

o Add smooth scrolling navigation.

```html
<!-- Generate me a professional portfolio using web development technologies -->
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Nithin - Web Developer Portfolio</title>
    <link rel="stylesheet" href="styles.css">
</head>
<style>
    /* styles.css */
    body {
        font-family: Arial, sans-serif;
        margin: 0;
        padding: 0;
        background-color: #4d4242;
    }
    header {
        background-color: #d58585;
        color: #fff;
        padding: 20px;
        text-align: center;
    }
    nav ul {
        list-style: none;
        padding: 0;
    }
    nav ul li {
        display: inline;
        margin: 0 15px;
    }
    nav ul li a {
        color: #000000;
        text-decoration: none;
    }
    section {
        padding: 20px;
        margin: 20px;
        background-color: #5bb8cb;
        border-radius: 5px;
    }
    .project {
        margin-bottom: 20px;
    }
```

```html
    footer {
    }
</style>

<body>
    <header>
        <h1>Nithin</h1>
        <nav>
            <ul>
                <li><a href="#about">About Me</a></li>
                <li><a href="#projects">Projects</a></li>
                <li><a href="#contact">Contact</a></li>
            </ul>
        </nav>
    </header>

    <section id="about">
        <h2>About Me</h2>
        <p>Hello! I'm Nithin, a passionate web developer with over 5 years of experience in creating dynamic and
            responsive websites. I specialize in HTML, CSS, JavaScript, and various web development frameworks.
            My goal is to build user-friendly and visually appealing websites that provide an excellent user experience.</p>
    </section>

    <section id="projects">
        <h2>Projects</h2>
        <div class="project">
            <h3>Project One: E-commerce Website</h3>
            <p>Developed a fully functional e-commerce website using React and Node.js.
                The website features a user-friendly interface, secure payment integration,
                and a robust backend for managing products and orders.</p>
        </div>
        <div class="project">
            <h3>Project Two: Portfolio Website</h3>
            <p>Created a personal portfolio website to showcase my skills and projects.
                The website is built with HTML, CSS, and JavaScript,
                and includes responsive design to ensure it looks great on all devices.</p>
        </div>
    </section>

    <section id="contact">
        <h2>Contact</h2>
        <p>If you'd like to get in touch with me, please feel free to reach out via email at
            <a href="mailto:Nithin@example.com">john.doe@example.com</a> or connect with me on LinkedIn at
            <a href="https://www.linkedin.com/in/Nithin" target="_blank">linkedin.com/in/johndoe</a>.
        </p>
    </section>

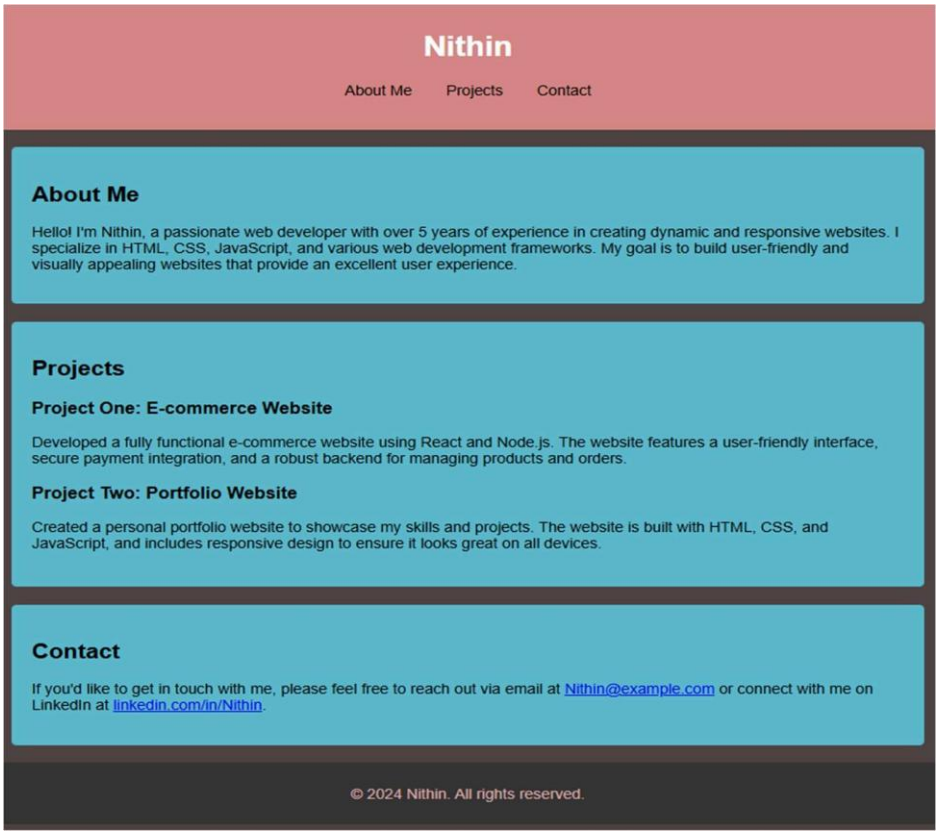
    </footer>
</body>
</html>
```



Task 2 – Online Store Product Page

Design a product display page for an online store.

Requirements:

• Display product image, title, price, and "Add to Cart" button.

• Use AI to:

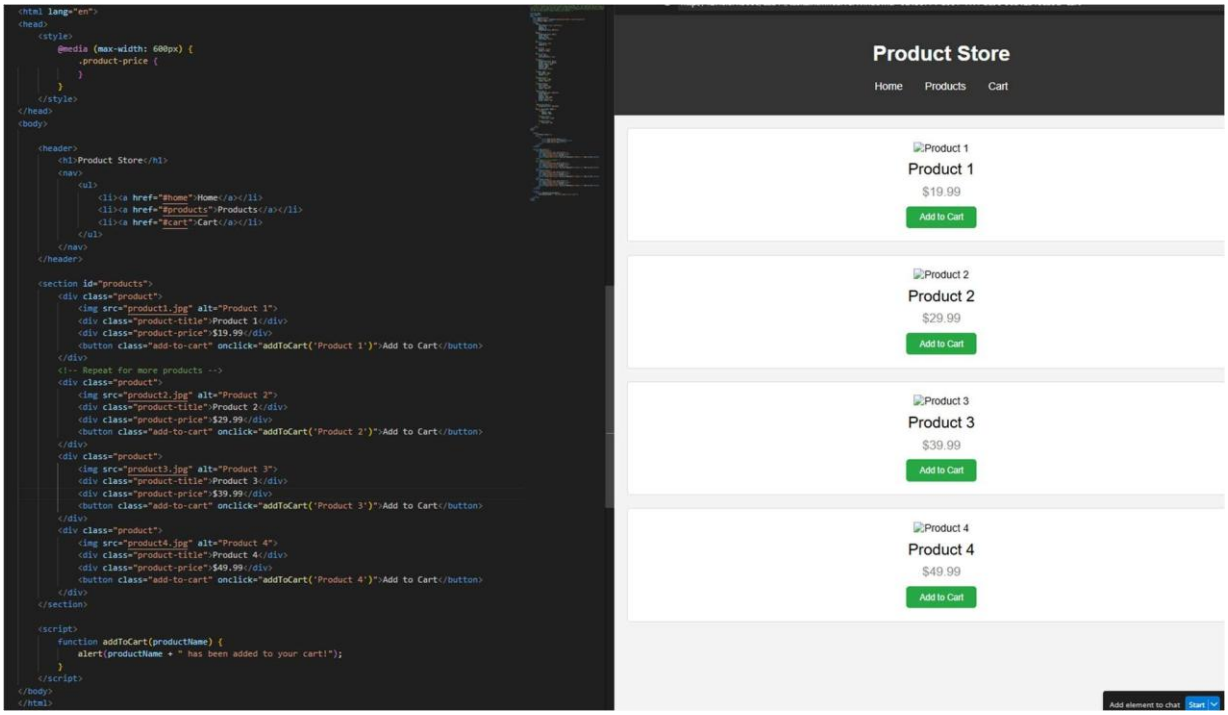
o Style with BEM methodology.

o Make layout responsive.

o Add hover effects and "Add to Cart" alert

```html
<!-- Create a responsive online store product page using HTML, CSS, and JavaScript that displays a product image,
 title, price, and an “Add to Cart” button. Use BEM methodology for CSS, add hover effects, responsive layout,
 and show an alert message when the Add to Cart button is clicked.and the product must be more than 5 and good interface
 and add the home button, product details,cart details -->

<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Product Page</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            margin: 0;
            padding: 0;
            background-color: #f4f4f4;
        }
        header {
            background-color: #333;
            color: #fff;
            padding: 20px;
            text-align: center;
        }
        nav ul {
            list-style: none;
            padding: 0;
        }
        nav ul li {
            display: inline;
            margin: 0 15px;
        }
        nav ul li a {
            color: #fff;
            text-decoration: none;
        }
        .product {
            background-color: #fff;
            border: 1px solid #ddd;
            border-radius: 5px;
            padding: 20px;
            margin: 20px;
            text-align: center;
        }
        .product img {
            max-width: 100%;
            height: auto;
        }
        .product-title {
            font-size: 1.5em;
            margin: 10px 0;
        }
        .product-price {
            color: #888;
            font-size: 1.2em;
            margin: 10px 0;
```



Task 3 – Event Registration Form

Build an event registration form for a conference.

Requirements:

• Collect name, email, phone number, and session selection.

• Use AI to:

o Add form validation with JavaScript.

o Make the form accessible with labels and ARIA.

o Style with a professional look

Lab14 > task3.html > ...

```html
<!-- Create an Event Registration Form using HTML, CSS, and JavaScript that collects
 name, email, phone number,and session selection. Add JavaScript form validation,
 ensure accessibility using labels and ARIA attributes,and style the form
 with a clean professional design.-->
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Event Registration Form</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            background-color: #f4f4f4;
            margin: 0;
            padding: 0;
        }
        .container {
            max-width: 600px;
            margin: 50px auto;
            background-color: #fff;
            padding: 20px;
            border-radius: 5px;
            box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
        }
        h2 {
            text-align: center;
            color: #333;
        }
        form {
            display: flex;
            flex-direction: column;
        }
        label {
            margin-bottom: 5px;
            color: #555;
        }
        input, select {
            padding: 10px;
            margin-bottom: 20px;

Profile Summary

Experienced web developer with a strong background in HTML, CSS, and JavaScript. Passionate about creating responsive and user-friendly websites.

Skills

- HTML5 & CSS3
- JavaScript & jQuery
- Responsive Design
- Version Control (Git)

Education

Bachelor of Science in Computer Science, XYZ University, 2020

Experience

Web Developer at ABC Company, 2020-Present

Task 5 – Restaurant Menu Page

Design a digital menu page for a restaurant.

Requirements:

• Display menu items with name, description, and price.

• Use AI to:

o Suggest a food-friendly color palette.

o Design a responsive card-based layout.

o Add hover effects on menu items.

Lab14 > task5.html > html > body > div.menu > div.menu-item

```html
<!--Create a restaurant digital menu page using HTML and CSS that
 displays menu items with name, description, and price in a responsive
 card-based layout. Use a food-friendly color palette and add
 hover effects on menu items for better user interaction. -->
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Restaurant Menu</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            background-color: #fff8f0;
            margin: 0;
            padding: 0;
        }
        header {
            background-color: #ff6347;
            color: #fff;
            padding: 20px;
            text-align: center;
        }
        .menu {
            display: flex;
            flex-wrap: wrap;
            justify-content: center;
